CLEAN COSMETICS

BRAND STORY

A study for my skin,
Now it's a promise for Your Skin

ABOUT HOW 'LessChemi' BORN

Become a cancer patient

A university professor who had taught nutrition for 20 years around became a cancer patient in 2021 and was no longer able to use regular cosmetics.

Uncomfortable skin condition caused by general cosmetics

Many artificial compounds mixed in general cosmetics were irritating, causing my skin to sting, turn red, and skin barrier to break down.

Developing cosmetics that safely protect the skin

A developer who has been a professor majored in food nutrition, biochemistry, physiology, microbiology etc. She becomes aware of the health she applies on skin as well as the health she eats. She developed 'LessChemi' (skincare cosmetic) that safely use and giving the skin time to relieve on its own using Fermentation ingredients from natural certified organic Makgeolli.

Free of suspected percutaneous poisoning ingredient clinically Proven vegan (no cruelty)

Scientifically verified, free of more than 72 to 97 suspected skin toxicity ingredients. In addition, all products are vegan (no cruelty). Plus, each product has been proven effective through more than 5 to 12 clinical trials.

Use of burn ointment cosmetics nomads

The developer had helped to many people undergoing treatment and those who have sensitive skin one day in their life cycle. She used burn ointment ingredients like beta-sitosterol for the first time in skincare cosmetics and it helps cosmetics nomad's skin relieves.

Committed to consumers those who have sensitive skin one day in their life cycle

It is clinically proven sensitive skin applications, hypoallergenic, weak acidity, itching relief (dryness), redness relief (skin soothing) etc. It is vegan waterless skin care products made of up to 97% or more from natural materials by making waterless a formula of galactomyces from organic food and vegan substances used in burn ointment. It protects the skin gently and the skin can recover on its own. By awakening the natural moisture factor in the stem cells, it not only protects the outside, but also helps the skin recover on its own, accompanying the sensitive skin to gradually become healthy.

Health Skin Every Day ! good skin is healthy skin

Sensitive skin can be a medical condition, like a developer's, but it can also occur in many other ways, such as with severe stress, aging, or a baby with a weakened immune system. Not a disease but also uncomfortable skin condition. It is a LessChemi created for those who have sensitive skin one day in their life cycle and wants to be relieve and revive skin.

KEY INGREDIENT

Galactomyces / Beta-sitosterol

Galactomyces

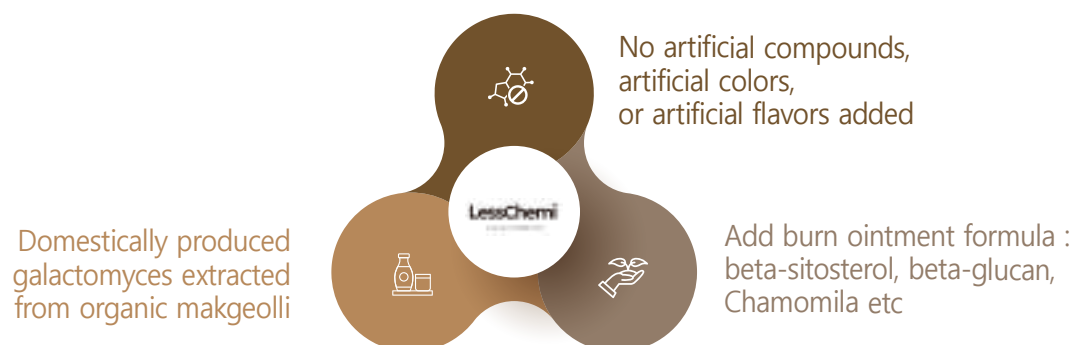

Galactomyces, a natural enzyme that comes out when making organic makgeolli, is characterized by strengthening cells on the skin to retain moisture, so it increases the skin's moisture content, giving the skin time to recover on its own.

Well-protected skin is immune, making it healthy, clear, and transparent.

Beta-sitosterol is a natural ingredient extracted from vegetable oils such as soybeans, radishes, cabbage, and goji. Also used as the main ingredient in burn situation, it is a typical burn ointment that protects the skin mild and intact from external irritation, promotes skin regeneration, and helps relieve damaged skin. It is known to play a role in connecting tissues in a healthy manner.

Beta-sitosterol

**The one and only in the world, created through countless samplings,
direct application, and further ingredient formula.**

Galactomyces ferment filtrate

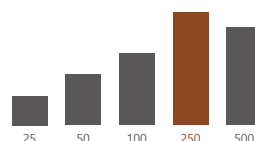

Skin whitening effect

Tyrosinase is an enzyme involved in melanin biosynthesis.

The lees fraction exhibited concentration-dependent tyrosinase inhibitory activity.

Anti-aging effects

DPPH radical scavenging activity and increased collagen synthesis were observed in the treated leeks at various concentrations.

Beta-sitosterol efficacy evaluation

Evaluation of skin irritation relief efficacy 1

Evaluation of the skin irritation relief effect of Sito Lipo 5.0(W)
32.64% reduction in skin irritation
